REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to a method of classification of an input image in picture or graphic classes. Each independent claim identifies the uniquely distinct feature, "for comparing the result of each feature algorithm to one or more previously selected thresholds, and if, according to previously determined rules, any comparison is determinative of the class of the input image, classifying the input image in either the picture or graphic classes according to the previously determined rules, otherwise indicating the result is indeterminate". The closest prior art, Kurita et al. (USPN 5,311,336), disclose an image processing apparatus with an outline extracting section for extracting an outline of an input image and a color converting section for converting the color of the outline extracted into a predetermined color, wherein the apparatus is capable of extracting the outline of an input image, applying color conversion to the outline extracted, and emphasizing a pattern such as a character, a graphic pattern or the like; while Takakura et al. (USPN 5,264,946), disclose apparatus and method for image extraction with threshold adjustment, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
